SUMMARY

A Computer Science Student eager to leverage my skills and enthusiasm, I am seeking opportunities to gain valuable industrial experience and contribute as a developer in a professional setting.

EDUCATION

Bachelor in Computer Science
PVG College of Engineering and Technology · Pune, Maharashtra · 2025

12th Board, HSC
Araham Jr College · Pune, Maharashtra · 2021

10th Board, SSC
Rosary High School · Pune, Maharashtra · 2019

PROJECTS

Smart India Hackathon
PVG College of Engineering and Technology · October 2023 - December 2023
· Pitched our idea to industrial professionals.
· A platform for Project Management and Project Sharing with professional mentors helping project ambiguities.

Full Stack Development Project
github.com/Aditya-0712/E-Commerce · August 2024 - November 2024
· Developed a fully working E-Commerce website which comprises of all basic features such as cart, wishlist, payment methods, orders, accounts, reviews, comments, etc.
· A full-stack dynamic website built on the principles of Database Mangement Systems.
· Technology Stack :- Node.js, express.js, MongoDB, mongoose, Javascript, HTML & CSS, EJS.

COURSEWORK

Python for Data Science and Machine Learning
Udemy · 2024 · Python

Modern React with Redux
Udemy · 2023 · Javascript (JSX)

NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno)
Udemy · 2023 · Javascript

Web Development Bootcamp
Udemy · 2022 · HTML, CSS, JavaScript

EXPERIENCE

Full Stack Intern
Next24 Technologies   January 2024 - March 2024, Noida
· I was thrilled to be selected as a Web Development intern at Next24 Technologies, a dynamic startup based in Noida. This opportunity came through the government internship portal AICTE and spanned two months in an online format. Each week, I received various tasks that I needed to complete before their respective deadlines and present during our weekly meetings. My responsibilities ranged from creating Figma designs and implementing frontend features to handling backend operations like authentication, validation, and

session management. Additionally, I worked on developing parody websites and continually expanded my knowledge by learning new concepts.

SKILLS

Front End:- HTML, CSS, Javascript, React.js, Bootstrap, Tailwind, Figma
Back End:- Node.js, Express, MongoDB, Mongoose, Embedded Javascript, MySQL
Programming:- DSA, DBMS, OOP, C++, Java, Python
Data Science:- Pandas, Matplotlib, Seaborn, NLTK, Sci-kit Learn.
